K - TIP HAIR EXTENSIONS

K TIP
SLAVIC HUMAN HAIR

Keratin hair extensions are customizable, available in regular or baby bond sizes for precise application. These extensions use a keratin adhesive to attach extension strands to the natural hair, employing a heat tool for secure bonding. The customization options allow for targeted volume, length, and color enhancements, providing a seamless blend with natural hair. Designed for durability, keratin extensions offer a long-lasting, minimal-damage solution to hair enhancement needs.

Longevity: 1 year+

I TIP BEADS HAIR EXTENSIONS

MICROBEADS
SLAVIC HUMAN HAIR

The Micro Beads technique for hair extensions involves attaching small, individual hair strands to your natural hair using tiny, silicone-lined beads. This method is popular as it requires no heat, glue, or chemicals for application. It offers a semi-permanent solution that allows for hair flexibility, natural movement, and easy maintenance. Ideal for adding length, volume, or even color highlights, micro bead extensions can be adjusted and reused, making them a versatile choice for those looking to enhance their hair's appearance.

TAPE IN HAIR EXTENSIONS

TAPE IN
SLAVIC HUMAN HAIR

Tape-In Hair Extensions are applied using thin, lightweight wefts with medical-grade adhesive tape. The extensions are installed by sandwiching a small section of natural hair between two tape wefts, creating a flat, discreet, and comfortable attachment. This method requires no heat, no glue, and no chemicals, making it a gentle option for many hair types. Tape-In extensions offer a semi-permanent solution with a natural look, easy maintenance, and quick application. Ideal for adding length, volume, or dimension, they can be removed, repositioned, and reused, making them a practical and salon-favorite technique.

SEAMLESS CLIP INS
SLAVIC HUMAN HAIR

If you have thin hair and find it difficult to conceal traditional clip-in extensions, our Seamless clip-ins are the perfect solution for adding volume and length. Our latest technology uses silicone wefts that lay flat against the scalp and are invisible to the eye. The hair is fused to thin silicone wefts, which keep your hair damage-free and tangle-free, giving you a natural-looking result. Please note that colors may vary due to monitor settings, and shades may appear darker or lighter on the screen than in real life.

- Features a lighter, softer silicone band that is more comfortable than traditional clip-ins.
- Each strand of hair is fused into the silicone band to reduce shedding and tangling, and prolong the lifespan of the extensions.
- 50% thinner at the top with an invisible band that sits super flat against the head for a seamless look.
- Double drawn to be thick from root to tip, for maximum volume and length.
- Color and heat safe to ensure the extensions can be styled to match your hair perfectly.

Set includes **7 clip-in pieces** of varying widths for easy customization:

- **Two 3" pieces with 2 clips**
- **Three 5" pieces with 3 clips**
- **Two 6" pieces with 2 clips**

Longevity: up to 2 years
